

360 FENCE PRODUCTS

QUALITY ORNAMENTAL FENCE PRODUCTS

360 FENCE

Introducing a new era in ornamental fence

360 Fence manufactures a comprehensive line of steel ornamental picket fence systems, providing quality maintenance free “wrought iron” style products.

With 35 years of manufacturing and design experience in metal finished products, our fences are manufactured to exacting standards demanded by today’s consumer with attention to detail and workmanship.

Stepping away from traditional production methods, our plant in Tulsa, Oklahoma, utilizes state-of-the-art production processes. Materials are formed, cut and powder coated with techniques capable of meeting precise tolerances, producing exclusive quality results.

Our unique patented Apollo fence design offers strength, protection and an attractive appearance. Features of our custom designed fence include our patented **Slide-Lock** rail system and a one-of-a-kind pressed point picket. Additionally, unlike many ornamental fences that are welded together, our pickets are fit firmly in place through laser cut rail slots. This design allows each fence panel to follow grades by up to 25%, avoiding stair stepping.

Why choose 360 Fence?

- *Customer oriented design, production and sales*
- *Dedication to quality in every aspect of our business*
- *American Made: Manufactured and assembled in Oklahoma*
- *Security: Patented Slide-Lock Rail System*
- *Workmanship: Automotive quality metal working standards*
- *Metal Finishing: State-of-the-art powder coating techniques*
- *Material Selection: Top quality Steel construction*
- *Elegant Design: Unique Fence and Gate Styles*
- *Color Variety: Five standard selections with additional options*
- *20 Year Warranty*

*360 Fence gives you the fence you need
– the look you want – at a price you can afford.*

360 FENCE

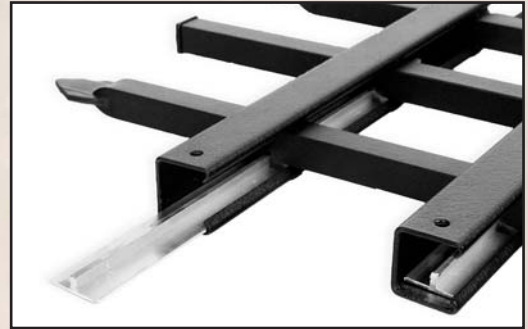

UNIQUE DESIGN

What makes 360 Fence stand out from the rest?

PATENTED SLIDE-LOCK RAIL SYSTEM

360's patented Slide-Lock fence rail security system is the most durable picket locking mechanism on the market. After fence pickets are inserted into our rails, a U-shaped G90 galvanized steel patented Slide-Lock is inserted through the rail securing each picket firmly in place. Our system provides a sturdy metal barrier, where others rely on flimsy internal metal wires or external fasteners. Additionally, our patented Slide-Lock system increases the strength of the fence railing by 20%.

Patent No. 6752386

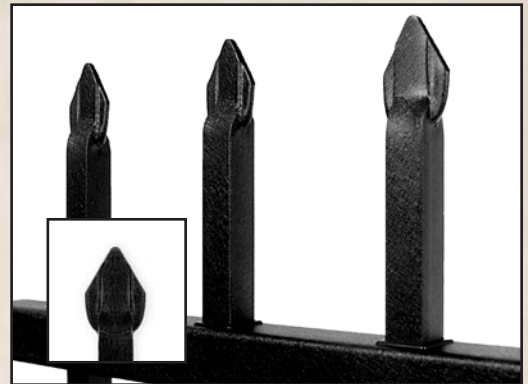

ABILITY TO FOLLOW PROPERTY GRADES

The unique design of our Apollo fence system allow it to follow grades up to two feet per fence panel. Because of our unique patented Slide-Lock system, we can provide property grade flexibility without compromising fence barrier security.

PRESSED POINT PICKET

Unlike other flared or pointed pickets, which are pressed by flattening a picket straight across the top, ours are a formed tip produced by a unique tooling process. The result is an attractive, superior, truly formed pressed point picket.

POWDER COAT PROCESS

Our process starts with a seven stage wash system, consisting of an alkaline wash, iron phosphite, sealer and DI Rinse.

Next, we apply a Zinc Rich base coat. Finally, we finish with a Polyester TGIC Top Coat.

FENCE GRADES

360 Fence provides three fence grades, each with it's own set of benefits.

APOLLO-R STEEL

Our Apollo-R line is constructed of G90 Galvanized Steel, providing the strength needed for today's residential applications. Our galvanized steel's strength is coupled with our unique powder coating process to produce a superior maintenance free product.

Apollo-R Table of Dimensions	
Pickets	3/4" x 3/4" x 18 Gauge
Rails	1 3/8" x 1 3/8" x 16 Gauge
Slide-Lock	G90 Galvanized Steel
Posts	2" x 2" x 16 Gauge
Picket Spacing	3 15/16" Between Pickets
Heights Available	3', 4', 4 1/2', 5', 6'
Widths Available	6', 8'
Alloy	G90 Galvanized Steel

APOLLO-S STEEL

Our Apollo-S line is constructed of G90 Galvanized Steel, providing the strength needed for today's commercial and residential applications. Our galvanized steel's strength is coupled with our unique powder coating process to produce a superior maintenance free product.

Apollo-S Table of Dimensions	
Pickets	3/4" x 3/4" x 16 Gauge
Rails	1 3/4" x 1 3/4" x 14 Gauge
Slide-Lock	G90 Galvanized Steel
Posts	2" x 2" x 16 Gauge
Optional Posts	2 1/2" x 2 1/2" x 14 Gauge
	3" x 3" x 12 Gauge
	4" x 4" x 11 Gauge
Picket Spacing	3 15/16" Between Pickets
Heights Available	3', 4', 4 1/2', 5', 6', 7', 8'
Widths Available	6', 8'
Alloy	G90 Galvanized Steel

APOLLO-1 STEEL

Our Apollo-1 line is constructed of G90 Galvanized Steel, providing the strength needed for today's industrial and commercial applications. Our 1 inch galvanized steel picket's strength is coupled with our unique powder coating process to produce a superior maintenance free product.

Apollo-1 Table of Dimensions	
Pickets	1" x 1" x 16 Gauge
Rails	1 3/4" x 1 3/4" x 14 Gauge
Slide-Lock	G90 Galvanized Steel
Posts	2 1/2" x 2 1/2" x 14 Gauge
Optional Posts	3" x 3" x 12 Gauge
	4" x 4" x 11 Gauge
Picket Spacing	3 15/16" Between Pickets
Heights Available	3', 4', 4 1/2', 5', 6', 7', 8'
Widths Available	6', 8'
Alloy	G90 Galvanized Steel

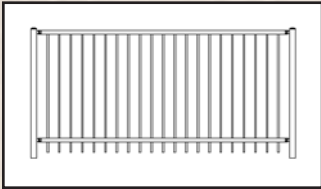

FENCE STYLES

360 Fence styles are available in all three Apollo fence grades and your choice of five standard colors. Our selection ensures you of the look you want at the grade you need.

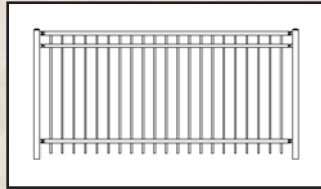

AMERICAN

Our American Style, with its smooth railing across the top, embraces classic ornamental fence design. This versatile fence lends itself to a wide range of uses from fence barriers to hand rails.

Available Styles: 2-Rail, 3-Rail (flush bottom rail also available)

American 2-Rail

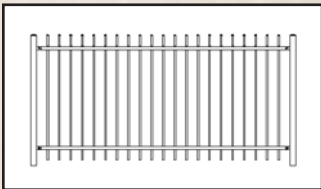

American 3-Rail

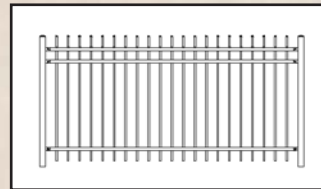

BUCKINGHAM

Our Buckingham Style recreates the traditional wrought iron fence look. Adding your choice of finials, this style produces a classic feel, emphasizing any landscaping.

Available Styles: 2-Rail or 3-Rail with choice of picket finial
2-Rail or 3-Rail with a pressed point "flare" picket (flush bottom rail also available)

Buckingham 2-Rail

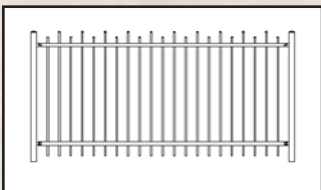

Buckingham 3-Rail

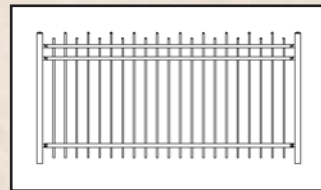

GLADIATOR

Our Gladiator Style blends elegance with power, emphasizing security with staggered pickets. Adding your choice of finials compliments any property line.

Available Styles: 2-Rail or 3-Rail with choice of picket finial
2-Rail or 3-Rail with a pressed point "flare" picket (flush bottom rail also available)

Gladiator 2-Rail

Gladiator 3-Rail

GATES

360 gates are available to match all of our fence styles.

*Buckingham With Caps
Single Walk Gate*

APOLLO WALK THROUGH GATES

Our matching walk through gates are designed to provide a seamless property barrier. We offer both single and double walk through gates.

Walk Through Gate - Table of Dimensions	
Pickets	3/4" or 1" x 18 Gauge
Rails	1 3/4" x 1 3/4" x 14 Gauge
Frame Posts	2" x 2" x 16 Gauge
Picket Spacing	3 15/16" Between Pickets
Heights Available	3', 4', 5', 6', 7', 8'
Widths Available	3.5', 4', 5', 6'
Alloy	G90 Galvanized Steel

Apollo Gates are shipped fully assembled, providing for easy installation. Ornamentation can be added to produce a classic wrought iron look.

*Buckingham Flare
Arched Swing Gate*

MERRITT SWING GATES

Our swing gates are ideal for residential driveway and commercial entry applications. We also offer commercial hinges for added support.

Merritt Swing Gate - Table of Dimensions	
Pickets	3/4" or 1" x 18 Gauge
Rails	1 3/4" or 2" x 14 Gauge
Frame Posts	2" x 2" x 16 Gauge
Picket Spacing	3 15/16" Between Pickets
Heights Available	3', 4', 5', 6', 7', 8', 10', 12'
Widths Available	8' through 20'
Alloy	G90 Galvanized Steel

Merritt Swing Gates are shipped in sections for on-site assembly, avoiding the damage associated with shipping large assembled gates.

*Buckingham Cantilever Gate
w/ Counter Support and Track System*

MERRITT CANTILEVER GATES

The Merritt Cantilever Gate is designed for commercial entry, providing superior security. Included are counter support panels and our track system for smooth operation.

Merritt Cantilever Gate - Table of Dimensions	
Pickets	3/4" or 1" x 18 Gauge
Rails	2" x 2" x 16 Gauge
Frame Posts	2" x 2" x 16 Gauge
Picket Spacing	3 15/16" Between Pickets
Heights Available	4', 5', 6', 7', 8', 10', 12'
Widths Available	8', 10', 12', 15', 16', 20', 24'
Alloy	G90 Galvanized Steel

Merritt Cantilever Gates are shipped in sections for on-site assembly, avoiding the damage associated with shipping large assembled gates.

Because gates are susceptible to punishment, they become the most important part of any fence system. To provide superior strength, our structurally sound gate frame is produced with heavy walled steel. In addition to our strong gate system, we offer a variety of commercial and residential gate hardware.

ORNAMENTATION

Our ornamentation allows for customization to match any personality, property or landscaping

SCROLLS AND FINIALS

Our selection of scroll and finial ornamentation is available in your choice of five standard colors.
